TABI KELVIN AYOMIDE

FULL-STACK DEVELOPER

tabibunmianne@gmail.com | github.com/michaelkeane036-cmyk

Available for remote freelance projects, collaborations, and full-time developer roles.

PROFESSIONAL SUMMARY

Full-stack developer building dependable, responsive web products across interface, backend, data, and payment workflows. Turns practical requirements into clear experiences and maintainable systems, from business dashboards and ecommerce platforms to private collaborative apps and interactive websites.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, responsive UI

Backend & Data: Node.js, Express, Supabase, PostgreSQL, authentication, row-level security

Integrations: Stripe Checkout and webhooks, Resend, Cloudflare Turnstile

Delivery: Git, GitHub, Vite, Vercel, browser testing, accessibility-focused QA

SELECTED PROJECT WORK

MarketOS | *React, TypeScript, Supabase, Vite*
Built a mobile-first business operations workspace for sales, stock, expenses, debts, customer ledgers, receipt review, authenticated setup, persisted records, and daily business insights.
Live: market-os-zeta.vercel.app | Source: github.com/michaelkeane036-cmyk/MarketOS

Vasato | *Next.js, TypeScript, Supabase, Stripe*
Delivered a storefront and admin system with persisted orders before checkout, signed Stripe webhook processing, Supabase row-level security, Turnstile protection, Resend notifications, support, and tracking workflows.
Live: vasato-org.vercel.app

Our Love Dashboard | *React, Supabase, Vite*
Created a private shared dashboard for memories, dates, plans, albums, letters, milestones, and mood check-ins with synchronized Supabase-backed data.

TABBYBLAKES | *HTML, CSS, JavaScript*
Built a responsive artist platform that brings music, merchandise, events, booking, and audience-facing content into a cohesive web experience.

EDUCATION

ESAE University
Class of 2025
